Shaping the future with Superior Craftmanship

Founded 5 years ago, MEPA is setting solid standards and know-how in the welding, mechanical industry and surface treatment.

Our mission is to guarantee our customers the best service and end product, enhancing the specifics of each process.

MEPA is a dynamic organization, always attentive to technological innovation, both in terms of systems and products.

Surface Treatment & Coating

INSPECTION & TESTING
NDT Inspection

"QUALITY PRODUCT" is our philosophy.

We provide a reliable and professional expertise & service at a competitive price. We constantly invest in increasing our professional skills & in the latest equipment & machines, to ensure maximum quality for our customers. MEPA, an expert also in the industrial painting sector, guarantees high quality standards.

Visit the MEPA plant

Our plant is located in a strategic area of Albania, only a few kilometers away from the port of Durrës & easily reachable from Tirana International Airport, between the beautiful sea of Shëngjin and marvelous high mountains. We provide warehouse, transport and logistics management services.

Low Cost Engineering

We take pride in our technical team, composed of young engineers who are passionate about software and advanced technology.

- ♦ Design
- ♦ Industrial Projects

Services
& Products

Carpentry

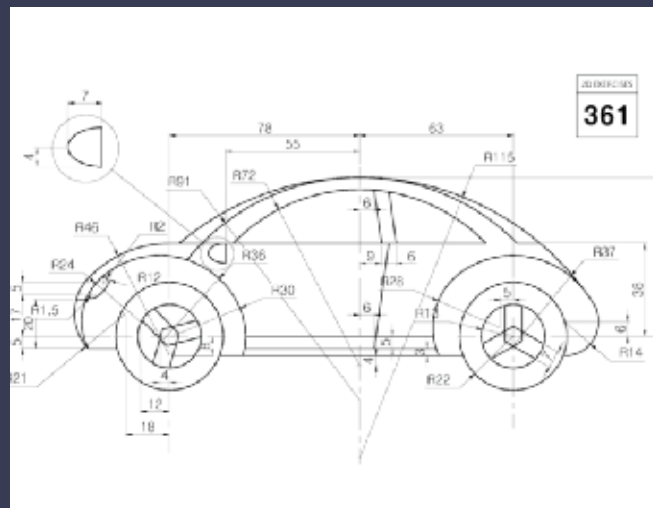

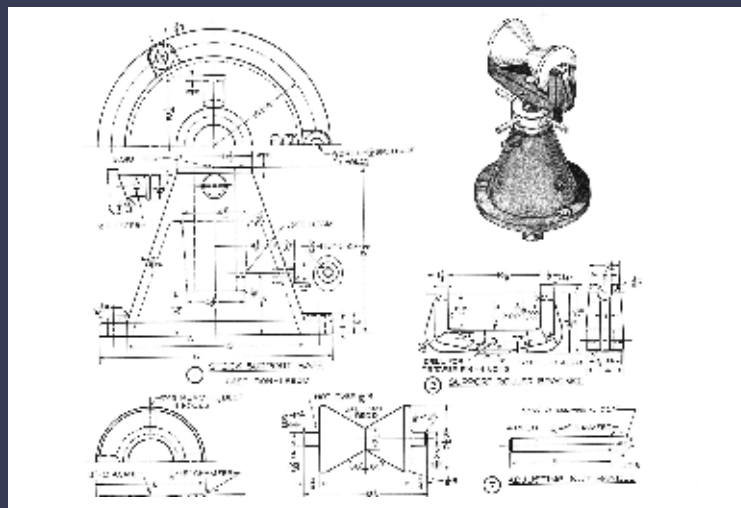

Our highly qualified welding engineers ensure the achievement of the top quality.

Light and Medium Carpentry
Basses for industrial machinery

- ♦ Bucket
- ♦ Carcasses
- ♦ Structure
- ♦ Steel structure for buildings

Overview

Services
& Products

MEPA constantly invests in increasing professional skills, through technical assurance instructions and the latest equipment & machines, to ensure maximum quality for our customers.

Machines for metallic structure direction

- ♦ Plasma 2 x 6m
- ♦ Bending machine 60 ton – 300ton
- ♦ Calendering's until 15mm x 4m
- ♦ Welding machine
- ♦ Drilling, Grinding and Beveling machine

We are able to develop and supply any liquid or powder coating solution for the production of large batches, but our structure allows the production and management of even small quantities, maintaining high standards of final product quality.

We were born with simple painting, but over time we have constantly updated our processes, perfected the production cycles and expanded the range of processes.

MEPA is ISO 9001 certified.

The quality of the painting processes first and then of the painted product is guaranteed by constant monitoring, carried out by expert operators who make use of validated procedures and periodically calibrated instruments.

& Products

Surface Treatment & Coating

Processing

MEPA is able to paint plastic materials, metals and alloys:

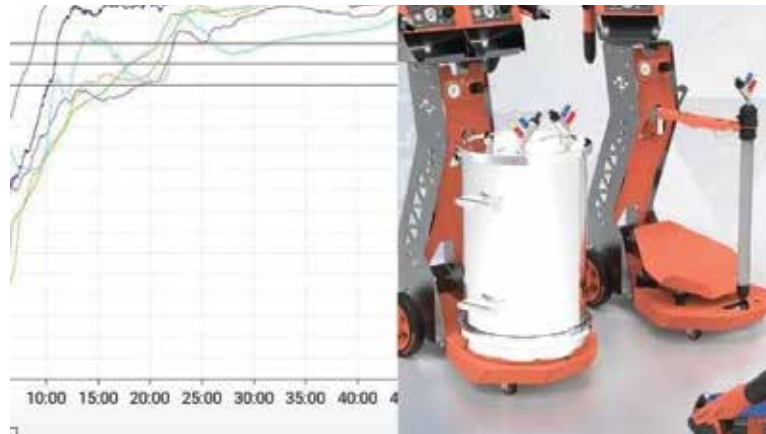

- ♦ Liquid painting
- ♦ Powder painting
- ♦ Sandblasting

Inspection

- ♦ Aesthetics checks
- ♦ Chemical checks
- ♦ Physical checks

Machinery & Inspection Equipment

- ♦ Sand blasting machine with tunnel, dimensions of entrance 1600 x 2000mm
- ♦ Powder coating box 7000mm
- ♦ Oven dimensions 13000 x 5000 x 3000mm
- ♦ Temperature logger DEFELSKO
- ♦ Coating thickness measurements

CRAFTING DURABILITY, ENSURING QUALITY

Experience the MEPA Difference

We are able to develop and supply any liquid or powder coating solution for the production of large batches, but our structure allows the production and management of even small quantities, maintaining high standards of final product quality.

We were born with simple painting, but over time we have constantly updated our processes, perfected the production cycles and expanded the range of processes.

MEPA is ISO 9001 certified.
